Appl. No.: 09/838,147

Reply to Office Action of September 21, 2007

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (currently amended) A method comprising:
connecting a first mobile terminal to an external communication network, via a wireless communication network, for accessing a resource;
receiving a request from a user of the first mobile terminal for information relating to the resource;
transporting the requested information to the first mobile terminal responsive to the request;
receiving a selection input from the first mobile terminal indicating the requested information to be transmitted to a second mobile terminal; and
negotiating a communication connection between the first and the second mobile terminals responsive to the selection input, the negotiating including the first mobile terminal establishing a communication connection with the second mobile terminal ~~and the first mobile terminal~~;
transferring the resource related information to the second mobile terminal over the communication connection.
2. (original) A method as claimed in Claim 1, wherein the second terminal is also a client of a server connected to the external network and the information facilitates access to an external network resource by the second terminal.
3. (original) A method as claimed in Claim 1, wherein the information comprises a URL.
4. (original) A method as claimed in Claim 2, wherein the information comprises browser settings for use by the second terminal.
5. (original) A method as claimed in Claim 1, wherein the information has been previously downloaded from the external network.

Appl. No.: 09/838,147

Reply to Office Action of September 21, 2007

6. (original) A method as claimed in Claim 5, wherein the information comprises a web page.

7. (original) A method as claimed in Claim 1, wherein the negotiation of the connection includes specifying the bearer to be used in transporting the information to the second terminal.

8. (original) A method as claimed in Claim 7, wherein the bearer is specified in accordance with a pre-determined user preference.

9. (original) A method as claimed in Claim 1, wherein the connection is made via the wireless communication network.

10. (original) A method as claimed in Claim 1, wherein the connection is made directly between the terminals.

11. (previously presented) A method as claimed in Claim 10, wherein the connection comprises an infrared link.

12. (original) A method as claimed in Claim 10, wherein the connection comprises a low power radio frequency link.

13. (original) A method as claimed in Claim 1, wherein the negotiation of the connection comprises sending a request from the first terminal to the second terminal for approval to establish a connection between the terminals and on receiving approval from the second terminal establishing the connection.

14. (original) A method as claimed in Claim 2, wherein both terminals are using a Wireless Application Protocol and the request is sent to the second terminal using a connectionless push command.

Appln. No.: 09/838,147

Reply to Office Action of September 21, 2007

15. (original) A method as claimed in Claim 14, wherein the connection is established using a bearer indicated in the connectionless push command.

16. (original) A method as claimed in Claim 1, wherein the external network resource is a server.

17. (currently amended) A method as claimed in Claim 2, wherein both terminals are using a Wireless Application Protocol and the resource related information comprises a WAP deck.

18. (original) A method as claimed in Claim 17, wherein the transfer of the WAP deck to the second terminal includes the step of substituting the WAP deck with a pre-existing WAP deck on the second terminal.

19. (original) A method as claimed in Claim 18, wherein the pre-existing WAP Deck is deleted following the substitution step.

20. (original) A method as claimed in Claim 1, wherein the external network is the Internet.

21. (currently amended) An wireless communication terminal apparatus comprising:
a controller arranged-configured to receive user-selected information related to a resource via a wireless communication network and to send the resource related information to ~~another~~ a wireless terminal, wherein the controller is further arranged-configured to negotiate a connection with the ~~another~~ wireless terminal and subsequently to receive the information over the connection, wherein the apparatus comprises a wireless communication terminal.

22. (currently amended) An terminal apparatus as claimed in Claim 21, wherein the controller is configured to operate in accordance with a Wireless Application Protocol.

Appl. No.: 09/838,147

Reply to Office Action of September 21, 2007

23. (currently amended) An ~~terminal apparatus~~ as claimed in Claim 22, wherein the controller is ~~arranged~~ configured to receive the resource related information via a push command.

24. (currently amended) An ~~terminal apparatus~~ as claimed in ~~anyone of Claims~~ Claim 21, wherein the ~~terminal apparatus~~ is comprises a cellular radio telephone.

25. (currently amended) An ~~wireless communication terminal apparatus~~, comprising:
a controller ~~arranged~~ configured to receive user-selected information related to a resource via a wireless communication network and to send the resource related information to ~~another~~ a wireless terminal, wherein the controller is further ~~arranged~~ configured to negotiate a connection with the ~~another~~ wireless terminal and subsequently to send the information selected by the user over the connection, wherein the apparatus comprises a wireless communication terminal.

26. (currently amended) An ~~terminal apparatus~~ as claimed in Claim 25, wherein the controller is configured to operates in accordance with a Wireless Application Protocol.

27. (currently amended) An ~~terminal apparatus~~ as claimed in Claim 26, wherein the controller is ~~arranged~~ configured to send the resource related information via a push command.

28. (currently amended) An ~~terminal apparatus~~ as claimed in ~~anyone of~~ Claims Claim 25, wherein the ~~terminal apparatus~~ comprises is a cellular radio telephone.

29. (previously presented) The method according to claim 1, wherein the external communication network comprises the Internet.

30. (previously presented) The method according to claim 1, wherein the information related to the resource comprises content of the resource.

Appl. No.: 09/838,147

Reply to Office Action of September 21, 2007

31. (previously presented) The method according to claim 1, wherein the information related to the resource comprises a link to the resource.

32. (previously presented) The method according to claim 1 further comprising choosing a bearer for sending the resource related information.

33. (previously presented) The method according to claim 1 further comprising selecting the second mobile terminal based on a list providing association between terminal contact information and recipient information.

34. (previously presented) The method according to claim 1, wherein the second mobile terminal is not capable of handling the external resource contents.

35. (currently amended) A method, comprising:
connecting a first mobile terminal, via a wireless communication network, to an external communication network for accessing a resource;

~~selecting, by a user of receiving at the first mobile terminal a user input selecting,~~
information relating to the resource ~~that said user wishes to send to a second mobile terminal;~~

negotiating a communication connection between the first and the second mobile terminals; and

transferring the resource related information to the second mobile terminal over the communication connection,

wherein both the first and second mobile terminals use a Wireless Application Protocol (WAP) and the resource related information comprises a WAP deck, the transfer of the WAP deck to the second terminal including substituting the WAP deck with a pre-existing WAP deck on the second mobile terminal, the pre-existing WAP Deck being deleted following the substitution.

36. (original) The method according to claim 1, wherein the resource related information is transferred via a Short Message Service (SMS).

Appln. No.: 09/838,147
Reply to Office Action of September 21, 2007

37. (original) The method according to claim 36, wherein the resource related information transfer is comprised of a plurality of SMS text messages.

38. (original) The method according to claim 37, wherein an SMS text message is comprised of a URLCard.

39. (Currently Amended) ~~A terminal~~ An apparatus as claimed in claim 21, wherein the sending of the resource related information to the another wireless terminal is conducted via a Short Message Service (SMS).

40. (Currently Amended) The ~~terminal~~ apparatus according to claim 39, wherein the sending of the resource related information is comprised of a plurality of SMS text messages.

41. (Currently Amended) The ~~terminal~~ apparatus according to claim 40, wherein an SMS text message is comprised of a URLCard.
